

## A Digital Signature is....

- Highly secure
- Tamper-evident
- Cryptographically encrypted
- Multifactor authentication
- Certificate-based digital ID authentication

## Whereas a Physical Signature is....

- Lot of Paper work
- Easily tampered
- Can be copied
- Fraud issues
- Security Concerns

# Cygnature

An intuitive, easy-to-use digital signing solution that enables signing contracts, invoices, work order, approvals and almost any paperwork in minutes. Blockchain enablement in the solution maintains highest standards in security and authentication that you can trust. With Cygnature you can self-sign, in-person sign, or remotely sign. Customizable with smart APIs to seamlessly integrate with preferred email, cloud storage and business apps.

# Key Features of Cygnature

Completely customizable and seamless integration with any flow

Dual authentication vis, Aadhaar, face recognition, voice recognition, biometric, national ID, Video Image proof

PCI, GDPR and VAPT compliant, and supports e-signatures, digital signatures and hardware key

Simplified signing – sequential, parallel, face to face or video confirmation

World-class cryptographic algorithms maintaining integrity and robustness of data

Allows to create document for signature anywhere, anytime and on any device

Document storage in cloud or on-premise based on country regulations

Digital audit trail records geo coordinates, browser/device, timestamp, etc.

Blockchain Stamping

# | Benefits of Cygnature

## 02 : WORKFLOW EFFICIENCY

A three-step simplified workflow, traceability and reminders fast-tracks transaction settlement.

## 04 : TOTAL SECURITY

Multilayer security such as biometric, live video, geolocation and Blockchain adds the greatest value eliminating any scope of document tampering.

## 05 : TAMPER PROOF

Each electronic signature is unique, encrypted and tamper-evident, ensuring confidentiality of all transactions.

## 01 : COST SAVINGS

Cygnature replaces external third party and promotes paperless signing process resulting in significant direct and indirect cost savings.

## 03 : TRACEABILITY

Blockchain helps to trace history of the document changes through a series of timestamped chain of data to ensure data integrity.

## 05 : SMART CONTRACTS

Smart contracts eliminate the traditional agreement process and reduces the transaction time by up to 80%.

# Why Choose Cygnature

Blockchain enablement in the solution maintains highest standards in security and legality that you can trust.

- Cygnature is Completely customizable and has seamless integration with any flow
- We have Simplified signing – sequential, parallel, face to face or video confirmation
- The Document storage is in cloud or on premise based on country regulations
- Cygnature is Legally binding with major eSignature laws - ESIGN, UETA, and European eIDAS
- Cygnature has world-class cryptographic algorithms maintaining integrity and robustness of data
- Digital audit trail records geo coordinates, browser/device, timestamp, etc.
- It is a PCI, GDPR and VAPT compliant
- With Cygnature you can sign document anywhere, anytime and on any device
- Supports , Aadhaar, KYC/national ID, Biometric, authentication, Face recognition, voice recognition, e-signatures, Fingerprint authentication, hardware key verification

# Say Hello!
